

## André Brunel Le Gin 13

### Press Highlights

- 94 Pts. – VINEPAIR, *April 2025*

“From the Rhône in France, this grape-based gin features 13 botanicals — a nod to the 13 grape varieties grown in the famous wine region. The botanicals themselves are much more traditional: the usual suspects like juniper, angelica root, rosemary, and coriander all make their presence known, particularly the latter. Compared to other grape-based gins, the base ingredient has more of an impact on texture than flavor, and it’s an enjoyable drinking experience throughout.”
